

**Finance Report
L'Arche Internationale 2017-2022**

Where does L'Arche's money come from ?

The Community's money comes from the state, from donors, and from their own work.

The money of our countries comes from the communities and from donors.

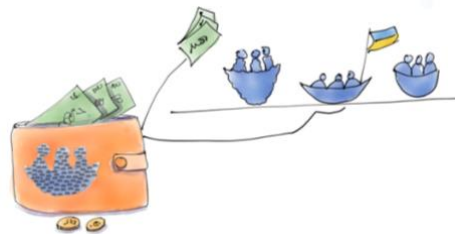

Our money at L'Arche International comes from countries, communities, and from donors.

Our expenditure

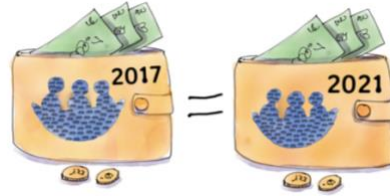

Our international expenditure is a lot smaller than the expenditure of all the communities put together.

We send money to communities who need it: for example, in 2022, the communities in Ukraine.

Our expenditure is at the service of unity, solidarity, fundraising and our teams working to support us all.

Our expenditure has not increased (except in 2022).

Our Income

There are some countries which give a lot of money.

In first place - France.

Canada, USA and UK have greatly increased what they have given.

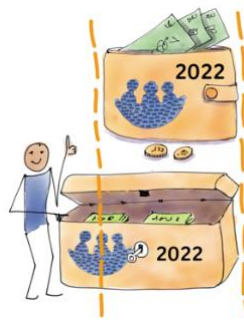

In other countries, progress is slower.

There are also major donors who help us by giving money, and those who give advice on using money well

We have received a little more money for the past two years

Results

Except in 2022, over the past few years, we received more money than we spent.

And we have managed to spend less.

Well done to all those who know how to raise money.

Bravo and thank you to our donors.
